Public Inquiry

October 19, 2001 17:18:48

IP address: 24.234.42.202

Name: Erik McMillan

E-mail: erikmcmillan@mac.com

Comments: Due to the hundreds of surface and subsurface atomic/nuclear bomb tests that have been previously conducted, many surface and subsurface areas of the NTS are radioactively contaminated, and will remain so for thousands of years. As a result the NTS already exists as a national nuclear waste dump. The radioactive material which will be stored in the proposed storage facility will impose no greater threat to the environment than that which presently exists. Use the NTS as nuclear waste storage facility. There is no justification for potentially contaminating other areas of the US.
